Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Cho (US 6,087,718).

Cho shows a structure of a device (see Fig. 2) comprising a leadframe 3 having a leadframe pad, the leadframe pad having an upper surface and a lower surface; a first chip 5 having a plurality of bonding pads 4 (see column 2, line 41) arranged on a first active surface; a first adhesive member 8 arranged between a portion of the first active surface and a portion of the lower surface of the leadframe pad, the first adhesive member attaching the first chip 5 to the leadframe; a second chip 7 having a plurality of bonding pads 7 formed on a second active surface and a backside surface opposite the second active surface; a second adhesive member arranged between a portion of the backside surface and a portion of the upper surface of the leadframe pad, the second adhesive member attaching the second chip 7 to the leadframe pad.

Concerning claims 2 and 3, wherein the leadframe pad includes a central opening; and the first chip is mounted to the lower surface of the leadframe pad in a manner that exposes at least a portion (each in claim 3) of the first plurality of bonding pads within the central opening, please see Fig. 2.

Art Unit: 2815

Concerning claim 4, wherein the second adhesive member is formed from a combination of an adhesive tape member and a cured liquid adhesive, please see column 2, lines 55+.

Concerning claims 5-18, please see the above discussion and see columns 2 and 3.
